

Movies App

1. Implemented

1.0 Sign Up

- The sign up page for user and admin is the same page. But, the difference varies with the secret admin code. If one wants to signup as admin, then they have to provide the secret admin code. Only, By providing that code they can be an admin.

1.1 Log In

- The log in page for user and admin is the same page. But the difference varies with the toggle option, there is a dropdown toggle available with options user and admin.

- A user can only log in to the user portal, if an user tries to give admin toggle option, 404 page will be popped.

- And admin will be able to login to both user portal and also the admin portal with the same credentials.

1.2 User Portal

- Once the user log in, they can see all the available venues and shows in that venues. They can click on any show and will be redirected to show details.

- A user can click provide the no of tickets they want to buy, and hit submit. Once submitted, they will be shown the total amount of tickets. By clicking, confirm to buy, they tickets will be purchased.

- All the purchased tickets by a user, can be seen from the Bookings page, along with the timings and no of tickets. Rating is added, but not implemented fully!

- And there is profile page, Which is not implemented fully, right now i am showing the no of tickets purchased in total by this user.

1.3 Admin portal

- Once the user log in to Admin portal, if they are a new admin, then they will be shown empty page with “Add venue” button. Once they add a venue, it will be shown on the admin home page.

- Once a venue is added, there will be options for “Add a show” , “ Edit venue” and “ Delete Venue “.

- By clicking on Add a show, the user will be redirected to the show form page, they can enter the details and submit the form. Once submitted, it will be redirected to the admin home page, now user can see the show under that venue.

- For a show, there will be “Actions!” Button. By clicking on action, user can see the show form, under which there will edit show and delete show options.

- By changing the form details and clicking on edit show, will edit the show. And by clicking on delete show will delete the show and redirect to admin home page.

- By clicking on Edit venue, venue form page will be opened and user can change the details and click submit to edit the form.

- By clicking on Delete Venue, all the shows under the venue and also the venue will be deleted.

- Summary for admin will have the no of tickets sold for each venue and each show.
